

Nancy, a beautiful blond Californian girl, goes to Las Vegas. On the first day she arrives, she jumps at the nearby casino to play roulette and bets all her money on no. 23. She wins!

Next round, she bets all her money and those she won *again* on no. 23. And she wins again!

Finally, she bets all her money, absolutely everything, *again* on no. 23. Miraculously, she wins for the third time! Now she is a millionaire!

All people are congratulating her and ask to share her amazing strategy. 'It's simple, - says Nancy, - 23 is my lucky number. I arrived on July 7th, so I have 7 twice, and my room number was no. 7 as well, so now I have three times 7, that is, $7 + 7 + 7 = 23!$ '
