Dear Dr. Wu,

> Please read my new paper.

Sorry, your "new paper" is from June 26, 2023, at 20:01:20, exactly as the one you sent three times previously.

You again wrote (p. 6): "LIGO's successful measurement of spacetime metric ripple is certainly the greatest experimental breakthrough in the history of GR".

Can you detect pink unicorns dancing with red fat herrings?

Read pp. 18-20 in <https://chakalov.net/GWP.pdf>

For your convenience:

https://chakalov.net/pp_18_20.jpg

You also wrote (p. 16): "Spacetime metric field is not a special material field, it is only the geometric aspect of the 4-dimensional moving matter continuum."

The 4-dimensional *moving matter continuum* is created by the arrow of Time: the spacetime *itself* is evolving. Read again the facts at p. 19 in <https://chakalov.net/GWP.pdf>

NB: Are you and your colleagues ready to reveal the dirty little secrets of GW parapsychology ?

Dimi Chakalov

Zhaoyan Wu wrote: "Particularly, in GR, the metric field g contains all geometric information of the spacetime. (...) The name we call metric field of spacetime "gravitational field" sounds as if it's a force field, not non-material. But spacetime metric field does not exchange energy-momentum with matter particles and matter fields. We say it does not carry energy-momentum. In physics, force or interaction always means exchange of energy-momentum. The so-called gravitational field (actually the metric field of spacetime) is not a force field, and gravity is not a natural force."

Zhaoyan, what you wrote above is IRRELEVANT to the issue of *gravitational radiation* (forget the fake GWs). Why? Because The spacetime *itself* is evolving: read Q4/A4 at p. 19 in <https://chakalov.net/GWP.pdf>

It's a whole new ball game.

Yes, we can make gravity a natural force, but only with the Fifth Force along the arrow of Time.

Kip:

Read closely 'Gravitational Wave Parapsychology' at

<https://chakalov.net/GWP.pdf>

(14 June 2023, 10 pages)

I discussed on p. 3 your "GW event" on 17 August 2017:

<https://chakalov.net/Nancy.pdf>

Sec. 5, Summary and conclusion at

https://chakalov.net/Sec_5.jpg

I didn't mention Rainer Weiss, because I do believe he is an honest person and was totally unaware of your "blind injections" on 14 September 2015 mentioned at the link above.

By the end of 2023, there will be an enormous scandal about the fake GW150914. I trust you and Barry Barish will be alive and well to explain how you managed to detect pink unicorns dancing with red herrings on 14 September 2015. I will be happy to help you.
